🪪 PROFILE

Motivated software engineer with expertise in full-stack development, including React, Angular, and Java. Experienced in building scalable applications and managing projects that improve efficiency and user experience. Eager to apply problem-solving skills and technical knowledge to contribute to meaningful projects and support team success in a collaborative environment.

🎓 EDUCATION

Master of Computer Application,
Kerala Technological University
2020 – 2022
- 87%

Bsc.Computer Science,
University of Calicut
2017 – 2020
- 66%

Plus 2, GVHSS *Madappally*
2015 – 2017
- 81%

🧠 SKILLS

- React.js
- Angular
- JavaScript
- Bootstrap
- MongoDB
- Node.js
- Bootsrap
- Java
- Css

💼 PROFESSIONAL EXPERIENCE

Software Engineer Trainee, *NeST Digital*
August 2022 – August 2023
- **Angular**
- **java Springboot**

📚 COURSES

MEARN Stack Development Expert-Angular and React, *Luminar Technolab,Kakkanad*
2024

📂 PROJECTS

System G Portal
- Developed a robust Dealer Portal application to efficiently manage and edit hospital orders and surgical requests.
- Leveraged Angular for front-end development, Spring Boot for back-end processing, and MySQL for database management to ensure seamless integration.
- Optimized order processing and hospital coordination by enhancing request handling, leading to improved operational efficiency in surgical procedures.

Easy-Charge
- Developed a front-end for the EV charging station platform using Android and Python, creating an intuitive user interface.
- Built a scalable backend using both Django and Flask frameworks to handle data processing, booking management, and secure payment transactions.
- Integrated features for locating nearby EV charging stations with detailed facility information, ensuring a seamless and efficient charging experience for users.

🌐 LANGUAGES

- English
- Malayalam

✏ DECLARATION

I declare that the above-mentioned details are true to the best of my knowledge and belief
